

## Battery Masters Student Fellowship

Individual research fellowships awarded to support Masters level study and research within the Master's degree programmes „Battery Materials and Technology“ and „Batterietechnik“ (University of Bayreuth).

Candidates can apply until the end of July 2022. Fellowships are sufficient to obtain a visum to enter Germany for study, and cover living expenses.

**Eligibility:** only for prospective students of the Master's degree programme „[Battery Materials and Technology](#)“ or of the Master's degree programme „[Batterietechnik](#)“ (Please see [application platform](#), deadline for international applicants: 15 July).

**Basis for Judging:** demonstration of his/her significant ability to perform research in the relevant fields and proven history of academic excellence in engineering and/or natural science. Competitive selection programme based on the application.

### Application Package:

- Confirmation of application for one of the Master's degree programmes (Please see [application platform](#)).
- A letter of recommendation from an individual familiar with the student's research and educational credentials.
- One-page biographical sketch of the student (including student's mailing address and e-mail address)
- Two-page (maximum) letter of motivation by the student describing his or her special interests in the field of battery research.

Please send you application to the following address:
